

MD. ASADULLAHIL GALIB

Software Engineer & Computer Science Graduate | Python Web & IoT Developer

Email: agalib016@gmail.com | Phone: +8801704680687 | Location: Agran, Baraigram, Natore, Bangladesh
LinkedIn: linkedin.com/in/md-asadullahil-galib-3a23523a5 | GitHub: github.com/agalib016 | Project: orbisastra.vercel.app

PROFESSIONAL SUMMARY

Dedicated Computer Science & Engineering graduate from Varendra University (CGPA 3.52) with an outstanding academic background (GPA 5.00 in SSC & HSC). Proficient in building responsive full-stack web applications using **Python**, writing robust systems in **C, C++, Java, and PHP**, and designing normalized relational databases in **MS SQL Server**. Passionate about embedded systems and IoT prototyping utilizing **Arduino and ESP32** microcontrollers. Known for high productivity, clean code craftsmanship, and rapid typing turnaround (**60 WPM**).

EDUCATION

B.Sc. in Computer Science & Engineering (CSE)
Varendra University, Rajshahi

CGPA: 3.52 / 4.00
Passing Year: 2026

Higher Secondary Certificate (HSC) — Science
Banpara College, Rajshahi Education Board

GPA: 5.00 / 5.00
Passing Year: 2022

Secondary School Certificate (SSC) — Science
Agran High School, Rajshahi Education Board

GPA: 5.00 / 5.00
Passing Year: 2019

TECHNICAL SKILLS

- Programming Languages:** Python, C, C++, Java, PHP, JavaScript (ES6+)
- Web Technologies:** HTML5, Modern CSS (Glassmorphism, Flexbox, Grid), Flask, RESTful APIs, Three.js, Globe.gl
- Database Management:** MS SQL Server (Relational DB Design, Schema Modeling, T-SQL, Queries & Joins)
- IoT & Hardware Prototyping:** Arduino, ESP32 Microcontrollers, Sensors, Actuators, Wi-Fi/Bluetooth IoT
- Office & Productivity:** MS Word, MS Excel (Formulas & Data Analysis), MS PowerPoint
- Core Strengths:** Touch Typing Speed: **60 WPM**, Algorithms & Data Structures, Clean Code Principles

FEATURED PROJECTS

OrbisAstra — Solar System & 3D Earth Explorer

Live Web Application

<https://orbisastra.vercel.app/>

- Built an interactive 3D astronomical simulation featuring real-time planetary orbits, 3D interactive Earth globe, continents, oceans, and astronomical calculations.
- Implemented smooth 60fps rendering, custom camera orbital controls, and responsive UI using Three.js, Globe.gl, and WebGL.

Python Web Application Architecture & Portal

Python & Flask

- Developed dynamic full-stack web architectures utilizing Python for server logic, RESTful API endpoints, and MS SQL Server for transactional persistence.
- Implemented modern dark/light themes, client-side responsive styling, and fast server-side processing.

Smart IoT & Telemetry Monitoring (ESP32 & Arduino)

Hardware & IoT

- Engineered smart embedded systems integrating environmental sensors, hardware actuators, and Wi-Fi communication with ESP32 and Arduino boards.
- Programmed C/C++ firmware routines for low-latency signal reading, data logging, and automated device actuation.

LANGUAGES & COMMUNICATION

- English:** Fluent (Professional Working Proficiency)
- Bengali:** Native / Full Professional Fluency
- Hindi:** Conversational | **Urdu:** Conversational
